

Community Electric Savings Program

The Passaic County Energy Pricing Cooperative System (PCECPS) was formed in 2010 for the purpose of joint purchasing opportunities for energy commodity procurement that would create energy savings for county and local government participants and aid in taxpayer savings. The latest initiative of the PCECPS is the establishment of a "Community Wide Savings"

Government Energy Aggregation Program. The County of Passaic will act as the lead agent and aggregator for all participating towns and municipalities which include towns in Sussex County, Morris County and Passaic County. This new program is designed to save the residents of participating municipalities and towns' money on their monthly electric utility bills. This program will offer a 100% Price Risk Guarantee to the community participating members that their contracted energy supply rates will never be higher than the respective utility price to compare.

The Borough of Stanhope has joined the PCECPS Community Aggregation Program. Residents of the Borough of Stanhope are invited to attend either of the public information sessions to be conducted, at which time an overview of the PCECPS Community Energy Aggregation program will be presented and residents will be provided the opportunity to ask questions. The public information sessions have been scheduled for Thursday, October 23, 2014 at 2:30PM and Monday, October 27, 2014 at the American Legion Hall – 119 Route 183, Stanhope.

Below are links with information on the Government Energy Aggregation Program as well as answers to some frequently asked questions about the program. This information will be updated based on the questions asked at the public meetings and will continue to be updated as questions are received from the community.
